

The next generation sprinkler system.

# Manufactured in Britain, installed worldwide.

The iCO\* water mist system offers a smarter and safer means to protect lives and property from fire.

Our discreet and easy to install solution is designed specifically for the residential and domestic markets, offering design flexibility whilst providing faster and more reliable protection.

Operating independently and using 80% less water than traditional sprinkler systems, our discreet nozzles cause less water damage whilst providing real time alerts to notify the owner in the event of a fire.

As a leading manufacturer of fire suppression systems, we sell through a network of accredited installers in the UK and overseas.

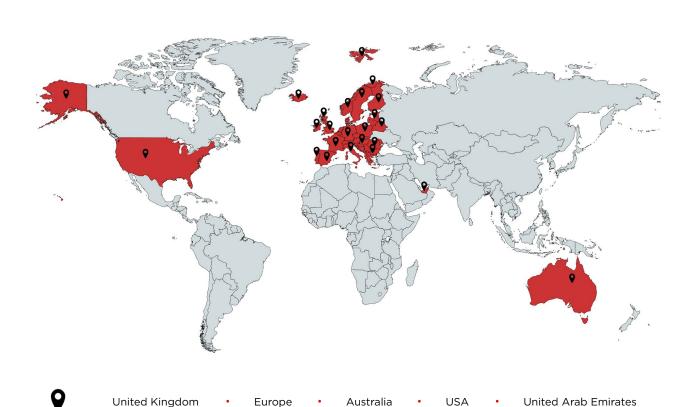

# iCO® Products

#### Features and specifications

iCO\* specialise in high quality, industry leading fire suppression systems. Our products are manufactured in-house and rigorously tested to ensure they meet the highest performance and safety standards.

The iCO\* system has undertaken an independent third-party assessment by Warrington Fire, a UKAS accredited laboratory and achieved all testing criteria. Tests reports are available upon request.

#### **iCO® MISTING NOZZLE**

The iCO\* easy fit nozzles are extremely low profile, sitting just 3mm below the ceiling and can be colour matched to any colour using the RAL colour code system.

#### iCO® PUMP UNIT V2

The sleek, compact iCO\* pump unit connects directly to the existing mains water supply: using an impressive 12 litres per minute for rapid and effective fire suppression.

The smart-enabled system includes an on-board monthly self test and manual test facility with real time monitoring and alerts.

The control board monitors the pump and is equipped with fire and fault N/O and N/C relays for use with third party equipment (e.g. alarms and fire panels).

Mounting

The iCO\* water mist system is more cost effective than traditional sprinklers, while using 80% less water.

# High pressure water mist versus traditional sprinklers.

Conventional fire sprinkler systems were originally developed for commercial applications. Whilst these systems perform well in specific situations, they are not designed for homes or residential properties.

iCO offers a more effective, cost efficient, sustainable and less damaging alternative to conventional sprinklers.

The iCO system has been developed to disperse a fine, high-pressure water mist, ensuring that the water evaporates as quickly as possible: decelerating the combustion process much more effectively than a traditional sprinkler system.

In the event of a fire the iCO system will discharge a calculated amount of water mist from the nearest nozzle, supressing the fire efficiently without causing excess water damage.

There is a reason that the iCO system has already been installed in thousands of homes.

# iCO Products

#### Key features and benefits

#### Water Requirement

The iCO° system is designed to operate using the lowest flow and pressure possible (12l/min @ 1 bar).

#### Rapid response

The iCO water mist system quickly eliminates all three elements that cause a fire (heat, fuel and oxygen).

#### Reliable activation

The iCO\* nozzles are highly reliable and can be activated by a double knock trigger (heat and smoke) as an option to reduce the risk of false activation.

#### Localised suppression

Only the nozzle nearest the fire will operate: protecting other areas of the property from water damage.

#### Minimal water damage

On average iCO° uses 80% less water than traditional sprinklers, minimising water damage when activated.

#### Fully accredited

The iCO\* system has an IP rating of IP53 and meets the fire performance tests outlined in BS:8458.

#### Real time monitoring and alerts

iCO\* System GSM Monitoring provides real time alerts to your smart phone in case of emergency or fault.

#### Low maintenance

The iCO\* pump has a removable cover so that the internal components can be serviced on-site if needed.

#### Easy installation

iCO\* simple design and flexible hoses make installation a breeze when compared to conventional sprinkler systems.

#### Discreet and compact design

The iCO\* pump unit will fit in most kitchen cabinets. Our nozzles are the most discreet on the market and can be colour matched to any colour.

#### Highly adaptable

iCO\* adaptability means the system can be installed in almost any residential or domestic category project.

#### **Environmentally friendly**

The iCO° system only uses water from the mains when needed: saving vast amounts of water.

#### Cost efficient

The iCO<sup>\*</sup> system connects directly to the current water supply: no need to upgrade the mains or install a tank.

#### Automated self testing

The iCO° pump unit automatically tests itself once a month to ensure the unit is functioning correctly. Unlike other systems no water is used and no drain is required.

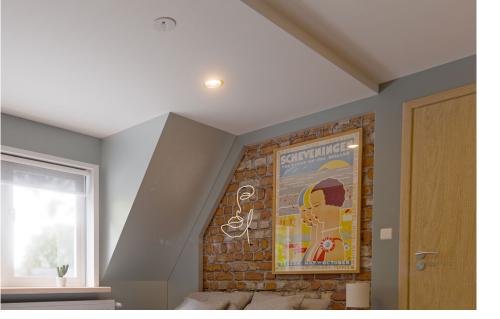

iCO® Misting Nozzles

**Technical Data** 

# Technical Data - iCO® Misting Nozzles

 Part No:
 PU002-02

 Dimensions:
 Ø72mm x 19mm

 Weight:
 200g

 K Factor:
 1.71

 Temperature Rating:
 57°C

Max Pressure: 1020 psi (70 bar)

Minimum Operating Pressure: 40 Bar

Response Type: Fast (Residential)

Occupancy Type: Domestic

Connection Size: 3/8" BSP

Minimum Spacing: 2m (6.5ft)

Maximum Spacing:  $4m \times 4m (13.2 \times 13.2ft)$ 

Colour: White as standard. Other colours available.

Material: 316 Stainless Steel
Fixing method: Torsion Springs

#### **ACCREDITATIONS**

iCO Products\* is ISO9001 accredited for the manufacture of water mist fire suppression systems and meets the fire safety and performance requirements of BS:8458 residential water mist standards.

All of our fire suppression products are manufactured in the UK and independently tested to the highest performance and safety standards to protect you and your home in the event of a fire.

iCO Products\* is a member of both the Fire Protection Agency (FPA) and Fire Industry Association (FIA). Our patented products have gained LPCB certification from the Building Research Establishment (BRE).

The iCO\* patented technology has been independently tested by Warrington Fire, a UKAS accredited laboratory.

#### **DIMENSIONS (MM)**

The iCO\* easy fit nozzles are extremely low profile. Sitting just 3mm below the ceiling they are the most discreet misting water mist nozzles on the market.

#### **INSTALLATION**

Our cost efficient and easy to install solution is designed specifically for the residential and domestic markets, offering design flexibility whilst providing faster and more reliable fire suppression.

As a leading manufacturer of fire suppression systems, iCO\* sell through a network of accredited installers in the UK and overseas.

iCO' systems must be designed, installed and commissioned by an accredited installer. On-going systems should be also maintained annually by an accredited installer.

SIGNIFICANT SAVINGS

**EASY INSTALLATION** 

HIGH PERFORMANCE

MINIMAL DAMAGE

LOW MAINTENANCE

#### **KEY FEATURES**

#### **Excellent Quality Assured**

iCO\* is independently tested in line with automatic water fire suppression systems standards.

#### Discreet Nozzle Design

The iCO\* easy fit nozzles are extremely low profile and can be colour matched to any colour using the RAL colour code system.

#### **Rapid Response**

The iCO\* water mist system quickly eliminates all three elements that cause a fire (heat, fuel and oxygen).

#### **Reliable Activation**

iCO\* nozzles are highly reliable and can be activated by a double knock trigger: as an option to reduce the risk of false activation.

#### **Localised Suppression**

Only the nozzle nearest the fire will operate: protecting other areas of the property from water damage.

#### Minimal Water Damage

On average iCO' uses 80% less water than traditional sprinklers: minimising water damage whilst providing the same performance.

#### **Minimal Smoke**

iCO\* uses very small droplets of water as a fine mist: quickly reducing the harmful smoke and toxic gases caused by a fire.

#### **Environmentally Friendly**

The iCO\* system only uses water from the mains when needed: saving vast amounts of water.

#### **Outstanding Durability**

The iCO\* nozzles are made from stainless steel and capable of withstanding extreme temperatures in the event of a fire.

#### Highly Adaptable

iCO\* adaptability means the system can be installed in almost any residential or domestic category project.

#### Easy Installation

iCO\* simple design and flexible hoses make installation a breeze when compared to conventional sprinkler systems.

#### **Ceiling Mounted Nozzles**

The iCO misting nozzles are situated in the ceiling: attacking the fire from above without obstruction from furniture.

#### **Battery Backup**

Battery back-up to provide audible alarm in the event of power loss or system failure.

#### **External Power Out**

12V power out for powering 3rd party equipment such as GSM alarm diallers for remote monitoring or external relays.

#### **Additional Relay Connections**

iCO $^{\circ}$  provides 2 fault & 2 alarm relays as standard for connection to 3rd party equipment such as fire alarms and AOV's.

#### **Real Time Monitoring and Alerts**

iCO® System GSM Monitoring provides real time alerts to your smart phone in case of emergency or fault.

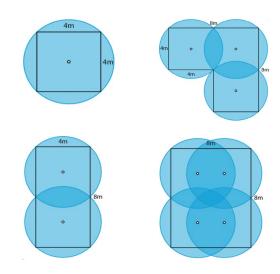

# Technical Data - iCO® Misting Nozzles

#### **INSTALLATION**

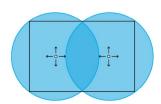

#### **NOZZLE SPACING: FLAT CEILING**

#### Installation Notes:

- 1 4x4m Grid (16m<sup>2</sup>)
- <sup>2</sup> Max 2m from wall
- <sup>3</sup> 2m minimum distance between nozzles

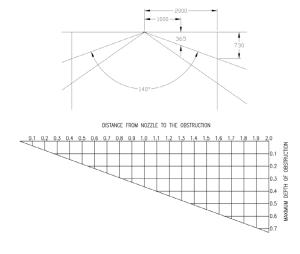

#### **NOZZLE ORIENTATION**

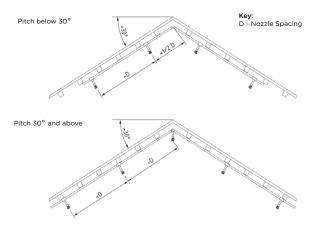

#### Installation Notes:

- <sup>1</sup> The preferred nozzle outlet orientation is perpendicular to the walls of a room.
- $^2$  Nozzles should be positioned away from obstructions to allow a 140  $^\circ$  spray pattern.

#### DISTANCE FROM OBSTRUCTIONS

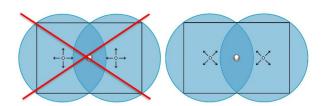

#### NOZZLE SPACING: SLOPED CEILING

#### Installation Notes:

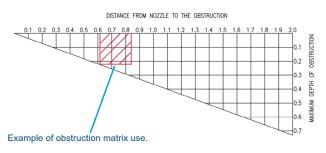

- <sup>1</sup> When installing iCO\* misting nozzles on sloped ceilings, the position of the nozzle should be determined by the pitch of the ceiling.
- <sup>2</sup> Where the pitch is below 30° iCO\* nozzles should be mounted at standard spacing when measured in line with the pitch of the ceiling.
- $^3$  Where the pitch is 30° and above, the first row of iCO $^{\circ}$  nozzles should be mounted within 300mm radially from the apex of the ceiling.
- <sup>4</sup> All nozzles should be mounted perpendicular to the ceiling as shown below

#### NOZZLE ORIENTATION: PENDANT LIGHT FITTINGS

#### Installation Notes:

- <sup>1</sup> Nozzle spray angles should not be directed at pendant light fittings.
- <sup>2</sup> The spray direction can be rotated 45° to spray into the corners of a room to avoid pendant light fittings. Nozzles should be at least 500mm away from a pendant light fitting.

If obstruction fits wholly inside matrix, nozzle positioning is unaffected.

#### Maintenance and Storage Notes:

- <sup>1</sup> The nozzle should be maintained in accordance with BS8458
- <sup>2</sup> Minimum/Maximum ambient temperature 4°C/40°C

Technical Data

## Technical Data - iCO® Pump Unit V2

Part No: PU001-00

Dimensions: 342mm (W)x 342mm (D) x 495mm

Clearance requirement: 100mm of clear space required around on each side for ventilation

240V Voltage rating: 13A Current rating:

Dedicated 16A fused supply from the NON RCD side of the board. Fire rated cable required Power Supply Connection:

Inlet connection: 1/2" BSP

3/8" BSP 60° Cone Outlet connection: Water requirement: 12 lpm @ 1 bar Minimum

79db @ 1 m Pump run sound pressure level: 0.5lpm Pump run Flow switch: Weight: 24ka

Serviceability Access: Removable front cover with security screws Internal Components: Corrosion resistant brass and stainless steel

Mounting: Floor or wall mount

Mains water pressure 1-10bar Standing Pressure:

Adjustable 10-100bar Running Pressure:

Set at 0.5 bar Mains low pressure monitoring:

Pressure relief set at 20bar Mains water over pressure protection:

Pump run time: 10min or 30min (adjustable with pump and actuated ball valve shut off)

Operation: Wet type or pre-action linked to smoke detection

Self-test: Monthly self-test

Heat protection: Thermal fuse set at 100°C Fire relay: 2x NO / NC volt free 30vDC 1 A Fault relay: 2x NO / NC volt free 30vDC 1 A

Priority demand valve output: 12v 1A Power out: 12v 1A

Power monitoring: Battery backed up audible alarm for fault monitoring

Battery monitoring: Check every 8mins if battery is detached

System indication: Internal LCD display

Control valve: Integral isolation valve, drain valve & pressure gauge

Strainer: Internal 500 micron filter

IP Rating: IP53

Manual controls: Internal and optional external manual start and stop button

## Technical Data - iCO® Pump Unit V2

Typical domestic category installation.

Typical residential category installation.

NOTE: All images in this document are for illustration purposes only.

#### **KEY BENEFITS**

**EASY INSTALLATION** 

USES JUST 12L/MIN AT 1 BAR OF PRESSURE

NO STORED WATER NEEDED

80% LESS WATER THAN STANDARD SPRINKLERS

**FULLY COMPLIANT** 

#### **KEY FEATURES**

#### **Excellent Quality Assured**

iCO\* is independently tested in line with automatic water fire suppression systems standards.

#### Neat, Compact Design

All iCO\* system components are integrated and housed within the iCO pump unit: no untidy valves or hoses.

#### **Automated Self-Test**

The iCO' pump unit automatically tests itself once a month to ensure the unit is functioning correctly.

#### Removable Cover

The iCO\* pump unit has a removable cover allowing easy access for servicing and maintenance.

#### **Outstanding Durability**

The iCO pump unit is comprised of steel: protecting it from fire and mechanical damage.

#### Wall or Floor Mounted

The iCO\* pump will fit in most kitchen cupboards or can be wall mounted if preferred.

#### Adjustable Run Time

The iCO\* pump can be adjusted to suit a 30min (Residential) or 10min (Domestic) application, depending on the need.

#### Adjustable Run Pressure

The iCO\* pump can be adjusted from 10 - 100bar to suit the particular building or application.

#### **Actuated Ball Valve**

iCO\* has an integrated actuated ball valve to shut off the water and power supply following elapse of the selected run time.

#### **External Power Out**

12V power out for powering 3rd party equipment such as GSM alarm diallers for remote monitoring or external relays.

#### **Battery Backup**

Battery backup to provide audible alarm in the event of power loss or system failure.

#### LCD Display

An internal LCD display is provided on the control & monitoring board to indicate the status of the system.

#### Thermal Fuse

A thermal fuse has been provided on the control & monitoring board to cut power if the temperature exceeds 100°C.

#### Manual Start/Stop Button

The iCO\* pump unit has a connection point for an (optional) manual start/stop button.

#### **Double Knock Activation**

The iCO $^{\circ}$  nozzles are activated by a double knock trigger (heat/smoke): significantly reducing the risk of false activation.

#### **Additional Relay Connections**

iCO\* provides 2 fault & 2 alarm relays as standard for connection to 3rd party equipment such as fire alarms and AOV's.

#### **Drip Tray with Float Switch**

The iCO\* float switch will close the actuated ball valve in the event of a leak: shutting off the water supply to avoid damage.

#### **Real Time Monitoring and Alerts**

iCO' System GSM Monitoring provides real time alerts to your smart phone in case of emergency or fault.
